

MATH225

Week 3 Lab Assignment

Name:

Instructor Name: Dr. Cruz-Sealey

Please use this template to help answer the questions listed in the lab instructions. The “parts” below refer to the parts listed in the lab instructions. Type your answers and post your screenshots in the spaces given below. Then, save this document with your name and submit it inside the course room.

Part 1. Read the assigned article.

Please reach out to your instructor if you did not receive the assigned article for the term by Monday of Week 3.

Title: Review of [\[The Impact of family Visitor Restrictions on healthcare workers in the ICU during the Covid-19 Pandemic\]](#)

Author(s): [\[Blair Wendlandt Mary Kime, Shannon Carson\]](#)

Summarize the assigned article in one paragraph. Make sure to quote and interpret at least one statistic. The study by Wendlandt, Kime, and Carson explores how restricting family visits during the COVID-19 pandemic impacted healthcare workers in ICUs. It was found that these measures, though essential for infection control, significantly heightened emotional strain on staff. For instance, "82% of ICU workers reported increased emotional exhaustion directly related to being the primary communicators with families, a role traditionally shared with visiting family members." This finding highlights the added pressure on healthcare workers, who had to manage both medical responsibilities and the emotional needs of patients and families. The authors call for strategies to support staff during similar future events.

Part 2. Choose ONE Graph, Table or Chart from the article.

Post a screenshot of ONE graph, chart or table from the assigned article (The article may have more than one chart/table/graph but you only choose one to analyze in this lab):
