

Discussion post for week 8

What resources will you use in order to prepare for the exam?

I'll review everything, from the videos to the textbooks. My understanding of the ideas and theories presented in the test will improve as a result. I will watch the final review multiple times until I understand. I will also watch professors' videos and practice working on the problems. During office hours, I will make use of the professor's time to clarify any unclear points and ask questions.

After looking at the objective review, what one concept do you feel you need to develop a bit more before the exam?

I believe I need to study the idea of hypothesis testing more thoroughly, and I will use extra resources if needed, so that I can make sure I understand it completely before the test. This is after going over the goals.

What day do you plan to take your first attempt? What day do you plan to take your 2nd attempt?

I have all the time in the world not working full-time now, so I have already taken my first attempt and didn't do so well, so I went back over the material and videos and took my second attempt and did so much better. Thankful for having a second attempt and thank you professor Brown for all the help throughout this course without your videos and stats calculator I would have been so lost I enjoyed your course.
