APA Scholarly Writing Paper: The Impact of Artificial Intelligence on Pediatric Nursing Practice

The purpose of this paper is to provide a summary of the Week 4 assigned article on artificial intelligence (AI) in pediatric health care and to address how technology helps or hinders nursing practice in relation to the article's topic. This paper explores the major applications of AI in pediatric nursing, including early disease detection, remote monitoring, and clinical decision support, while examining nurses' perceptions of AI and its potential influence on workflow, decision-making, and patient outcomes.

Assigned Article Summary

The article "Five ways artificial intelligence impacts pediatric health care" highlights five key AI applications that enhance pediatric nursing and patient care. AI-based predictive models can
