Total Points: 50 points Due Week 1

Directions for Week 4 ONLY (150 points):

Create an individual development plan to attain or strengthen professional nursing informatics competencies beginning of NR541 that was due Week 1. **For the week 4 assignment develop a plan to attain proficiency in writing Student Identified specific, measurable goals to attain/approve the competency (third column), select competencies for your plan than you believe align with your career path OR arbitrarily select 10 competencies for your assignment that identifies the basis for their plan (specific career path, desire for knowledge, or arbitrary selection) and how they progress through the program.**

Initial assessment	Core Competency
Circle the number that best represents your development needs at this point in time. 1= minimal learning needs related to this behavior	The nursing informaticist demonstrates competencies in professional knowledge and skills related to nursing informatics (NI) practice. Introduction The purpose of this self-assessment is to help you discover your level of competency. Competency is any knowledge or skill that an individual possesses that has the potential to achieve or forecast excellent performance. By assessing your level of knowledge or skill for each core-competency in
