

Please provide the following information and submit the document in the Canvas Gradebook under Week One Clinical Homework. This assignment is your attendance triggering Week One.

Provide the following information for each clinical site (if more than one, list each separately)	
Name of Site	Normalpsych
Preceptor Name	Dr. Morgan Bardall
Preceptor email address and phone number	Conxxct@noxxxlpsych.life 9x3-4x0-1x06
Location (city, state)	Belleville, New Jersey
Anticipated clinical schedule (Attach addendum if needed)	W, Th, F 10a-620p
What are your goals for the practicum?	
What are your goals for the first day?	My goal for the first day is to observe and familiarize myself with the workflow. I want to be able to build relationships with the preceptor and the patients. I want to be immersed in the provider role. I will ask questions that will help me develop my critical thinking skills. I will familiarize myself with the medications, diagnosis, symptoms, documentation, proper terminology, and clinical presentations of the patients. I will have a questioning attitude, and open-mind. I will focus on developing the skills imperative to conducting interviews. I want to be able to ask my preceptor their thought process when interviewing and managing each patient. Lastly, I will reflect on each interaction and evaluate what other potential interventions, assessment, and management plan could have been added.
What do you hope to achieve by the end of the session?	I hope to be able to perform an initial evaluation, manage medications, and conduct a medication management follow-up with minimal supervision from my preceptor. I want to be able to decide on which medication to prescribe for the patient and the patient education that comes along with it. I want to be able to apply my interviewing skills and knowledge to help improve patient outcomes.
