

NR584NP Week 5 Collaboration Café

Follow these guidelines when completing each component of the Collaboration Café. Contact your course faculty if you have questions.

General Instructions

Consider the quality measures that are currently analyzed at your practice location. If you do not have a current practice location, select a local healthcare facility or provider to answer the questions below.

Include the following sections:

1. **Application of Course Knowledge:** Answer all questions/criteria with explanations and detail.
 - Describe one clinical client-focused quality measure currently analyzed in your practice location.
 - What data is collected, and from where is the data taken?
 - Who is responsible for data collection, analysis, and reporting?
 - How is the data critically evaluated to accurately reflect the desired care outcomes? Who makes the decisions to apply the data to practice change?
 - What are advanced practice nurses' key challenges when evaluating quality measures in healthcare settings?

Answer:

Describe one clinical client-focused quality measure currently analyzed in your practice location.

A clinical client-focused quality measure currently analyzed in the facility I work in is Level 1 and Level 2 Trauma Activations.

What data is collected, and from where is the data taken?

There are many audit filters related to the trauma activations which includes GCS upon arrival, patient weight in kg, 2 IV attempts or less on pediatric patients, minimum of 2 sets of vitals, Level 1 trauma transferred out in less than 60 min, Level 2 trauma transferred out in less than 2 hours, and AUDIT-C score. The data is pulled from the EHR.

Who is responsible for data collection, analysis, and reporting?

The Trauma Program Manager and the Trauma Registrar share the duties
