

Week 8: Collaboration Cafe Post

- 1. Reflect on your learning experience in this course. Which concepts stood out to you and made an impact? How do you envision using these concepts in your future nursing practice as a master's prepared nurse practitioner?**

My learning experience throughout this course has been nothing short of insightful and engaging. There are several concepts that have stood out to me and have made a significant impact on me. Specifically, the concept regarding patient safety culture. This concept stood out to me as it placed a great emphasis on the importance of prioritizing patient safety and ensuring that all members of the health care organization bought into that culture. Additionally, the idea regarding risk mitigation had a significant impact on me as it highlighted the importance of identifying potential risks and creating and implementing strategies to minimize their impact. Health care organizations cannot stress enough how important it is to prevent adverse events and the goals of improving patient outcomes. As a future master's prepared nurse practitioner, I envision utilizing these concepts in various ways. For instance, I will encourage my peers, employees, and fellow staff members to have open communication regarding any errors or near misses as it allows everyone the opportunity to learn from these events and experiences to prevent any future occurrences. Furthermore, I will also be active in risk assessments and be sure to implement evidence-based interventions to mitigate all identified risks that may arise.

- 2. Describe how course learning activities and assignments will help you achieve *Program Outcome 3: Engage in lifelong personal and professional growth through reflective practice and appreciation of cultural diversity.* (Cultural Humility)**

The course learning activities and assignments will help me to achieve Program Outcome 3, which focuses on lifelong professional and personal growth through reflective practice and appreciation of cultural diversity, otherwise known as "Cultural Humility," in numerous ways. Reflective practice involves taking the time to think about and analyze one's actions to improve your own professional practice; this practice is essential in professional and personal growth. Throughout this course, a specific opportunity for reflective practice came within the week 3 risk management case study. Taking the time to analyze and think critically about real-world scenarios through the application of theoretical knowledge allows the student to further enhance his/her problem-solving skills and gives the student the opportunity to reflect on his/her actions throughout this process. Furthermore, cultural diversity is a key aspect within everyday life, and being able to not only understand it, but have an appreciation for cultural diversity will help each student foster and develop respect, empathy, and effective
