• Question 8

1 out of 1 points

Kyle is a 68 y/o male who comes to the clinic for his annual checkup. His chief complaint is that for the past couple of weeks he has had severe, sharp, excruciating pain in his abdomen, flank, and back. During the physical exam, the NP notices that on palpation of the abdomen she feels a palpable mass that is greater than 3 cm in width. To confirm Kyle's diagnosis the NP would immediately order which test(s)?
