Practice Dr. Robin Guisti

Module 3 | Part 3: Research Analysis

Introduction

The opioid crisis has become one of the most critical public health issues in the nation. Reports indicate that opioid-related drug overdose deaths are now the leading cause of injury-related fatalities in the United States (Opioids.gov, 2019). More Americans are dying from these overdoses than from car accidents. Various factors are contributing to this crisis. This is the topic I have chosen for further investigation. I have researched and selected a peer-reviewed article on this subject and have analyzed it. The findings from this analysis are presented below.

Step 1: Research Analysis

T o p i c o f I n t e r e s t :	Efficient Pain Control and Enhancements in Patient Outcomes and Satisfaction
Research Article:	Glowacki, D. (2015). Effective pain management and improvements in patient's outcomes and satisfaction. <i>Critical Care Nurse</i> , 35(3), 33-41. doi:10.4037/ccn2015440
