

Psychometrics

Ch. 6 & 7

Question 1

Jerome has scored a 10 on a test. How has he done?

- a.
On some tests, this might be indicative of a very good score.
- b.
On some tests, this might be indicative of a very poor score.
- c.
On some tests, this might be indicative of a moderate score.
- d.
We should ask Jerome how he thinks he has done. His thoughts about his score are part of what determines how he has done.

e.
All of these.

Question 2

Measures of central tendency tell you something about the middle of a series of numbers but hardly anything about the variability of a set of numbers.

True

False

Question 3

A histogram is the preferred method over the cumulative distribution for conveying information about the percentile rank.

True

False
