	15 Points	14 Points	12 Points	8 Points	0 Points	Reviewer
<u>Disease & Background</u> The student: 1. Identifies the disease condition 2. Gives a brief statement of incidence and prevalence in the US 3. The student briefly summarizes the disease pathophysiology 4. Identifies the typical clinical presentation seen in a patient with the disease (4 critical elements)	All 4 critical elements are present and complete	All 4 critical elements are present but some information may be only partially addressed or inaccurate.	3 critical elements are present.	2 critical elements are present	1 or less critical elements are present.	The presenter provided background and the respected pathophysiology of type I and type II diabetes. A portion of the epidemiology, prevalence and incidence rates in the US. A good job of linking incidence rates to mentioning that an excellent job on clinical presentation of II diabetes.
